

Green Statement

Adjustable

Environmental Awareness Policy

Adjustable Shelving, A Division of Karp Associates, Inc. is committed to protecting our environment. Our high quality steel shelving is fabricated from recycled steel, and all scrap steel materials accumulated from the fabrication process are recycled.

Additionally, Adjustable Shelving finishes all shelving products with an environmentally friendly, electrostatic powder paint coat that does not exhaust toxic fumes into our atmosphere.

Whether it is in the manufacturing process or packaging materials, Adjustable Shelving continuously explores new ways to be environmentally responsible, in order to create a healthier environment for our employees, our partners and our clients.

Protecting Our Environment. Protecting Our Future.
