Ex-Cell Kaiser LLC joins U.S. Green Building Council!

Ex-Cell Kaiser LLC is committed to protecting our environment and natural resources. We have chosen to team up with the U.S. Green Building Council in order to have, at our disposal, the best resources through people, knowledge and tools to continue to positively impact environmental sustainability.

Each and every day, we are looking for new ways to leave a positive environmental footprint, whether through our own day to day business operations or through the products we manufacture.

Internal efforts include, but are not limited to, the implementation of company and plant wide recycling procedures and initiatives, separation of recyclable waste, timed production processes to reduce energy consumption, purchase and use of green cleaning products and products made of recycled waste, such as paper products, office supplies, etc. Additional initiatives are in the planning stages.

- All packaging for Ex-Cell products contains between 30-40% recycled material content.
- EXL-COAT™ Powder Coated Finish contains no volatile organic compounds, emits negligible emissions into the air and overspray is 98% reclaimable.
- All Ex-Cell steel products contain over 30% recycled steel.
- All Ex-Cell aluminum products contain up to 70% recycled aluminum.
- All Ex-Cell stainless steel products contain an average recycled content of approximately 60%.
- Ex-Cell Kaiser's steel, aluminum and stainless steel products are 100% post consumer recyclable.

In addition, Ex-Cell will be introducing a new line of steel Recycling Receptacles for commercial use.

Information will soon follow, under separate cover, for the first recycling receptacle, the RC-33 YGR, a High Capacity, Heavy Duty, Indoor/Outdoor 33-gallon capacity steel receptacle.

If you have any questions, or would like any additional information, please do not hesitate to contact me directly at (847) 451-0451 or via e-mail at acosentino@ex-cell.com.

Regards,
